METHODOLOGY

Statistical Quality Score (SQS): position-weighted composite of per-90 Wyscout metrics, adjusted for league difficulty (CZ II $\times 0.82$ · Slovakia $\times 0.78$ · Slovakia II $\times 0.68$).

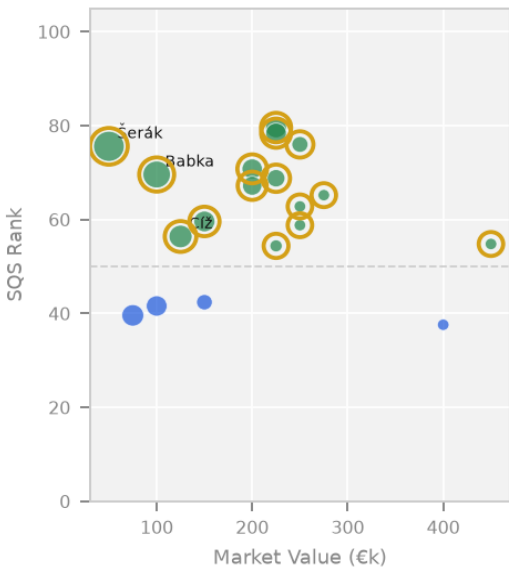

Bloom Index (BI): SQS percentile rank minus Market Value percentile rank within the same position pool. A positive BI indicates a player performing above what the market currently prices in — the core Jamestown value signal.

Market value model: XGBoost with 5-fold out-of-fold predictions to avoid in-sample inflation. Recruitment universe: CZ II + Slovak leagues, 2025–2026 season only.

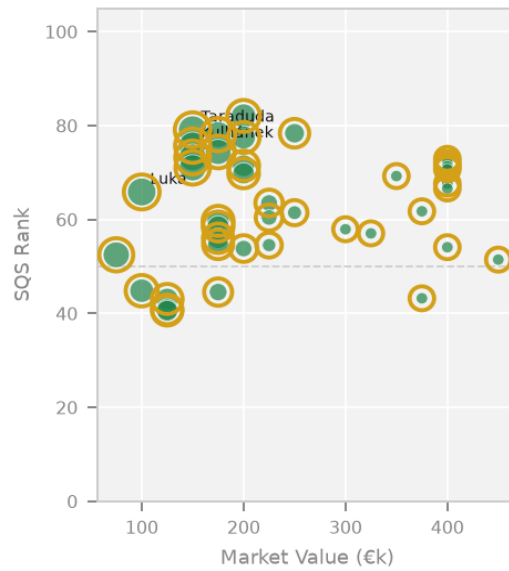

Value Map — SQS Rank vs Market Value
